## **Weather Takes Center Stage at Super Science Saturdays**

HUNTSVILLE, Ala. — Sci-Quest, Hands-on Science Center is offering *Super Science Saturdays* programs to children in kindergarten through 9th-grade every third Saturday of each month. These informal programs are designed to encourage a child's growing curiosity in science. Children will discover a variety of topics through hands-on activities.

*Super Science Saturdays* programs for Nov. 21 will be:

### **What's the Weather?**

Grades kindergarten through 2nd

Time: 10-11:30 a.m.

Fee: \$14

Warm front, cold front, wind chill, what are those? Find out in our wild program about weather! We will do experiments about how weather actually happens and learn how to read weather maps. A visit from a real weatherman may also be in the forecast!

### **Waves of Destruction**

Grades 3rd through 5th

Time: 10-noon

Fee: \$16

Reveal the secrets of one of the sea's most deadly monsters – the tsunami. Discover how these killer waves can race undetected across the ocean for more than 600 miles and then crash ashore, swallowing cities whole. Take the tidal challenge as we try to wave-proof a model town. Can you withstand the power of the tsunami?

### **Up, Up and Away**

Grades 6th through 9th

Time: 10 a.m.-1 p.m.

Fee: \$18

From helium to hot air, balloons can really take you places! Explore the history, as well as the physics and design of hot air balloons while we build and launch our very own. This program really is full of hot air!

All *Super Science Saturdays* programs will be held at Sci-Quest. To register for these programs, call 256-837-0606, ext. 252 or e-mail [reservations@sci-quest.org](mailto:reservations@sci-quest.org). For a complete list of *Super Science Saturdays* programs, visit [www.sci-quest.org](http://www.sci-quest.org).
