MCR LLC Wins \$36.8M Federal Aviation Administration (FAA) Contract

The FAA selects local firm to perform key mission support services for the Air Traffic Organization

Huntsville, AL, May 26 2009: The Department of Transportation, Federal Aviation Administration (FAA) announced the contract award for the Air Traffic Organization – Terminal (ATO-T) Program to MCR Federal LLC, of Huntsville, AL and McLean VA. The value of the contract is \$36.8 million for a period of performance to include a one year base and three, one year option periods.

MCR will be responsible for professional, technical, and support labor, as well as management services, supplies, materials, data, and facilities needed to accomplish the requirements of the agency. The ATO organization consists of 35,000 controllers, technicians, engineers, and support personnel. The ATO-T mission is to provide the safest, securest, and the most efficient air traffic services in the world.

The primary mission of the ATO-T organization is to move air traffic safely and efficiently. This contract will provide necessary support services to accomplish the acquisition, development, implementation, and life cycle activities identified within the FAA Capital Investment Plan (CIP) and achieve the objectives of the Flight Plan. The support services under this contract will include program management, program risk management, investment/alternative analysis, value engineering, budget formulation, and budget execution.

MCR's Chief Operating Officer Roderick Duke of Huntsville commented: "MCR is extremely proud of the work we do that benefits our Soldiers, Sailors, Airmen/Airwomen, Marines and Coast Guard. Now we can apply some of those same principles to help benefit all American's and individuals who travel within our air ports and skies. Needless to say we are very happy about the contract award. MCR has demonstrated to the FAA that we are one of their go-to contractors for key acquisition management support and integrated program management services. For MCR to continue helping keep our nation's air traffic safe is truly an honor and privilege we do not take lightly."
