

The Alabama A&M University Research Institute (AAMURI) will host the annual Small Business Technology Transfer/Small Business Innovative Research (STTR/SBIR) and HBCU/MI Technical Conference on January 25-27, 2010 at the Knight Center on the campus of Alabama A&M University. For registration, please click at

https://aamuri.aamu.edu/Conference/2010/conference2010_index.htm.

This meeting will bring together small businesses and scientists seeking funding for exploratory projects, who want to learn how to initiate such projects, and build partnerships. It will also provide an opportunity to meet with representatives from top HBCU/MIs in the country to explore potential funding opportunities and grants & contract partnership. Please join us and learn from the US Department of Defense (Army, Air Force, Navy, and DARPA), NASA, NIH and NSF the secrets on how to access billions of dollars of funding opportunities for Small Business Innovative Research and Small Business Technology Transfer as well as funding opportunities partnering with HBCU/MIs. Join us and learn about Nano-Bio Science & Sensors Research and Outreach Programs in Alabama. Researchers from various universities, small businesses, as well as program managers from industry will be available for team building and developing joint proposals.

An invitation is extended to small and disadvantaged businesses, scientists, faculty and staff of universities who are seeking funding opportunities, partnership/team building, and opportunities to meet with DoD, NASA, and NSF program managers, and fund managers with questions concerning fund management, compliance and contract development. For more information, please contact Dr. Daryush, Executive Director of AAMURI at ila@aamuri.aamu.edu.
