### Dynetics' James Young Promoted to Technical Integrator for Cyber

**HUNTSVILLE, Ala., July 6, 2010** – James Young, a veteran employee of Dynetics, has been promoted to Technical Integrator for Cyber, a new senior position in the company. Young will work with departments across Dynetics to identify and develop new areas where the company's capabilities can meet customers' needs in the cyber market.

Young has spent his 30-year career at Dynetics supporting the Intelligence community, most recently serving as manager of the Scientific and Technical Intelligence (S&TI) department. He grew this department to one of the largest in the company with customers that include every member of the S&TI community, along with members of the national intelligence and electronic warfare communities.

In his new position, Young will support the development, integration and awareness of net-centric solutions involving multiple organizations at Dynetics. He is responsible for ensuring that Dynetics' advertising, business pursuits and offerings in cyber reflect all the company's relevant technical capabilities.

Dave King, executive vice president of Dynetics, said, "This is a huge new area of growth in the government and the business world, and although we are involved in many ways, there are more areas where our capabilities can be applied. James' expertise in intelligence and other matters will bring a fresh perspective and new ideas about the emerging cyber market."

#### **About Dynetics**

Dynetics Inc., with headquarters in Huntsville, Ala., and offices throughout the United States, has delivered high-quality, high-value engineering, scientific and information technology solutions to customers within the U.S. government and a range of other market segments since 1974. Our mission is to bring expertise, integrity and tenacity to every relationship and to demonstrate our commitment to customers by providing powerful solutions to their technical challenges in intelligence, missiles, aviation, cyber and space.
