Dynetics Awarded Subcontract by SAIC to Serve Defense Intelligence Agency Supporting Combatant Commands, Service Intelligence Agencies

***As Part of SAIC Team, Company Will Provide Information Technology (IT) Services
in Support of Defense Intelligence Operations***

HUNTSVILLE, Ala., Aug. 17, 2010 – Dynetics announced today the award of a subcontract by Science Applications International Corporation (SAIC) [NYSE: SAI] to help provide Defense Intelligence Agency (DIA) support to the DIA Department of Defense Intelligence Information System (DoDIIS) Enterprise, Combatant Commands and Service Intelligence Agencies with information technology (IT) services. The Solutions for the Information Technology Enterprise (SITE) multiple award, indefinite-delivery/indefinite-quantity (IDIQ) contract awarded to prime contractor SAIC, has a one-year base period of performance, four one-year options and a ceiling value of \$6.6 billion for all awardees. This is the largest contract DIA has ever awarded.

The Defense Intelligence Agency is a Department of Defense (DOD) combat support agency that provides military intelligence to warfighters, defense policymakers and force planners in support of U.S. military operations and weapon systems acquisition. This contract will enable DIA to acquire the full scope of IT services and capabilities needed to accomplish its critical missions.

Under the contract, as part of the SAIC team, Dynetics will help provide worldwide coverage for IT requirements and technical support services and assist the government through system design, development, fielding and sustainment of global intelligence and C2 (command and control) assets vital to the security of the United States. The SAIC Team and other contractors will provide support as required in areas including program management; technology assessment and evaluation; network operations and administration; web and content management; and information assurance.

“Information technology is crucial to today’s warfighter, and Dynetics is pleased to be a part of this team that will support DIA in their mission to provide timely, objective and cogent military intelligence to warfighters and others critical to our nation’s defense,” said Jonathan Whitcomb, manager, Dynetics Information Technology and Products Operating Unit.

About Dynetics

Dynetics Inc., with headquarters in Huntsville, Ala., and offices throughout the United States, has delivered high-quality, high-value engineering, scientific and information technology solutions to customers within the U.S. government and a range of other market segments since 1974.
